

RETEST *for* SUCCESS

Orthopaedic Nurses Certification Board
Recognizing Excellence • Improving Care

How ONCB Helps YOU Earn Certification

You strive for excellence each and every day. You're committed to lifelong learning. ONCB now makes it easier to earn the only credentials that recognize your high level of knowledge and your passion for effective orthopaedic patient care.

Double The Opportunity for Certification Success — At No Additional Cost

With *Retest for Success*, if you are unsuccessful on the first attempt you can retest after 90 days without paying additional exam fees. A minimum of three RNs or NPs for the ONC® (basic credential) or ONP-C® (nurse practitioner credential) examination is required for this program. After three applications have been submitted, individual nurses at partner facilities can register as they become eligible and ready to test. Tell your colleagues and nurse managers about this unique program as your first step toward earning orthopaedic nursing certification.

To Help You Prepare

As a Retest for Success applicant, you will also receive a free General online practice examination from ONCB to jump-start your test preparation. Call ONCB (888-561-6622) with questions about Retest for Success and exam preparation.
